

Directions for mylar placement and vinyl applique

Mylar Instructions (Optional):

Place a piece of mylar over the area that is being embroidered and stitch out the “Lemonade” area.

After it has finished stitching out, tear off the excess mylar.

Applique instructions:

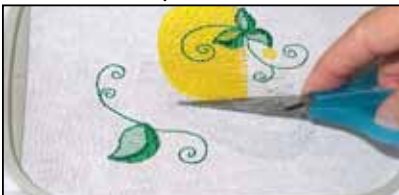

Use the thread cart as a guide to find out where in the design to stitch out the applique portion of the design.
Stitch out the placement guide.

Place a piece of clear vinyl over the placement guide.
Next sew the tack down stitches.

Trim the vinyl close to the stitches, being careful to not cut the stitches.

Next sew out the satin outline.

Continue the rest of the steps if needed.
